DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Caspelherr et al. (US 5,547,277). Caspelherr ('277) discloses a screw with a heat exchange function comprising a heat exchange medium chamber (14) located at a center section in the radial direction of said screw, said chamber running along the lengthwise direction of said screw (see Fig. 1); and a head exchange medium supply pipe (21, 22 and the portion to the right of 21 as seen in Fig. 1) supplying a heat exchange medium, said heat exchange medium supply pipe being stored in said heat exchange medium chamber; wherein said heat exchange medium supply pipe comprises split pipes and is split into two or more sections in the lengthwise direction, said pipe connecting means (21) bendably connects said split pipes (see Fig. 1). Regarding claim 3, said pipe connecting means is a bendable bellows (21). Regarding claim 4, a mixer comprises a barrel (20) and the screw discussed above with regard to claim 1 rotatably fit in said barrel. Regarding claim 5, an extruder comprises a barrel (20) and the screw discussed above with regard to claim 1 rotatably fit in said barrel.

Allowable Subject Matter

3. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
